PROFESSIONAL SUMMARY

Business Analyst (Product & Data) working in a fintech trading-platform team, turning broker API, trading-data and user-behaviour problems into clear requirements, tested releases and measurable outcomes. Reduced broker account activation time from **25 minutes to under 10**, restored **100% verified P&L accuracy** for active users and increased order submission success by **18%**. Skilled in requirements gathering, user stories, UAT, SQL (PostgreSQL), API testing in Postman, product analytics and Agile delivery in Jira and Confluence.

CORE SKILLS

Business Analysis: Requirements Gathering, BRD/FRD, User Stories, Acceptance Criteria, API Mapping, Process Mapping, Gap Analysis, Root Cause Analysis, Funnel Analysis, UAT, Stakeholder Reporting

Data & Analytics: SQL (PostgreSQL), Advanced Excel, Power BI, Mixpanel, Amplitude, KPI Analysis, Data Validation, P&L Reconciliation

Product & Delivery: Agile/Scrum, SDLC, Backlog Refinement, Requirement Prioritization, Release Validation, Jira, Confluence

Technical: REST APIs, Webhooks, JSON, Postman, API Validation, GitHub

Domain: Fintech, Algorithmic Trading Systems, Broker APIs, FIX Protocol basics, Execution Analytics, Trade Journaling

AI & Productivity: ChatGPT, Claude, Microsoft Copilot for documentation and analysis

WORK EXPERIENCE

BUSINESS ANALYST (PRODUCT & DATA) — AlgoRishi Pvt Ltd

Sep 2026 – Present

Hyderabad, India

- Mapped broker API endpoints and webhooks for integrations including Alice Blue and Angel One, reducing onboarding drop-off by **28%** and cutting account activation time from **25 minutes to under 10**.
- Wrote PostgreSQL queries to match daily signal alerts with broker-side execution logs; traced a **4% P&L discrepancy** to a data-pipeline lag, restoring **100%** verified P&L accuracy for active users.
- Tracked the live-alert-to-order journey in Mixpanel / Amplitude, identified a native-layout exit point and helped deliver One-Tap Execution, lifting order submission success by **18%** and live auto-executed traders by **35%**.
- Owned end-to-end UAT for the live push-alert experience; executed **50+ Postman test cases** and verified entry, target and stop-loss updates in under **500 ms**.
- Replaced a manual spreadsheet routine with direct product-usage metrics for the CEO and engineering lead, saving **8 hours** of data consolidation every week.
- Managed the Jira backlog, translated trading-engine requirements into user stories and acceptance criteria, and coordinated weekly sprint releases with **4 software engineers**.

PROJECTS

Automated Broker API Onboarding & Trading Signal Verification Engine

Work project · confidential details removed

Connected third-party brokers to the core signal engine and verified every execution against the intended trade.

- Gathered requirements and documented data and status changes between the app, broker authentication and signal engine, including failure states and activation checks.
- Built a verification trail matching signals to broker executions on identifiers, timestamps, instrument, quantity and price; exposed a feed lag behind a 4% leaderboard variance.
- Measured the notification-to-execution funnel to locate the largest exit point, shaping the One-Tap Execution change and its success measure.
- Proved release readiness with 50+ API and UAT cases across entry, target and stop-loss events; confirmed dashboard updates stayed below 500 milliseconds and tracked defects through weekly releases.
- Outcomes: 28% fewer onboarding drop-offs, activation under 10 minutes, 100% verified P&L for active users, and an 18% higher order submission rate.

EDUCATION

Acharya Nagarjuna University — Guntur, Andhra Pradesh

Jun 2023 – Feb 2027

Bachelor of Commerce (Computer Applications) | CGPA: 8.0/10

Languages: English (Advanced, C1), Telugu (Native), French (Upper-Intermediate, B2), Hindi (Basic, A2)
