English (C1) | French (B2)

PROFESSIONAL SUMMARY

Business Analyst (Product & Data) at a fintech trading-platform company, bridging product, engineering and data on **broker integrations, trading-data validation, product analytics and release quality**. Turns product needs into requirements, user stories and acceptance criteria, then validates them with **SQL, API testing and UAT**. Hands-on with PostgreSQL, Postman, Mixpanel, Amplitude, Jira, Confluence and Excel; familiar with Power BI. Working proficiency in English and French.

CORE SKILLS

Business Analysis: Requirements Gathering, BRD/FRD, User Stories, Acceptance Criteria, Process Mapping, Gap Analysis, Root Cause Analysis, Funnel Analysis, UAT, Stakeholder Reporting

Data & Analytics: SQL (PostgreSQL), Advanced Excel, Power BI, Mixpanel, Amplitude, KPI Analysis, Data Validation, P&L Reconciliation

Product & Delivery: Agile/Scrum, SDLC, Backlog Refinement, Prioritization, Release Validation, Jira, Confluence

API & Technical: REST APIs, Webhooks, JSON, Postman, API Mapping & Validation, GitHub

Domain: Fintech, Algorithmic Trading Systems, Broker APIs, FIX Protocol (basics), Execution Analytics, Trade Journaling

AI Tools: ChatGPT, Claude, GitHub Copilot for drafting and synthesis; outputs verified against source data

EXPERIENCE

Business Analyst (Product & Data) | AlgoRishi Pvt Ltd

Sep 2026 – Present

Hyderabad, India

- Mapped **broker API endpoints and webhook flows** for **Alice Blue and Angel One**, documenting activation steps, status changes and common failure cases.
- Queried **PostgreSQL** to reconcile source signals with broker execution logs; traced a **P&L mismatch to a data-pipeline delay** and supported correction of the verification flow.
- Analyzed the notification-to-order journey in **Mixpanel and Amplitude**; identified a mobile-flow exit point and helped shape the **One-Tap Execution** feature.
- Led **UAT for live push alerts** (entry, target, stop-loss) across **50+ Postman test cases**, validating dashboard updates against a **500 ms target**.
- Replaced a manual spreadsheet routine with **direct product-usage metrics** for CEO and engineering-lead reporting.
- Managed the **Jira backlog**, translated trading-engine needs into user stories and acceptance criteria, and coordinated **weekly releases** and defect tracking with four software engineers.

PROJECT

Broker API Onboarding & Trading Signal Verification

Confidential work project

Connected third-party brokers to the core signal engine and reconciled broker executions against intended trades.

- Built a **verification trail** matching signals to executions on identifiers, timestamps, instrument, quantity and price; traced a leaderboard mismatch to a feed delay.
- Documented data and status flows across the app, broker authentication and signal engine, including failure states and activation checks.

EDUCATION

Acharya Nagarjuna University | Guntur, Andhra Pradesh

Jun 2023 – Feb 2027 (Expected)

Bachelor of Commerce (Computer Applications) | CGPA: 8.0/10

LANGUAGES

English (Advanced, C1) | Telugu (Native) | French (Upper-Intermediate, B2) | Hindi (Basic, A2)
