### PROFESSIONAL SUMMARY

Business Analyst (Product & Data) at a fintech trading-platform company, supporting broker integrations, trading-data validation, product analytics and release quality. Translates product needs into clear requirements, SQL checks, API validation and UAT. Uses PostgreSQL, Postman, Mixpanel, Amplitude, Jira, Confluence and Excel; familiar with Power BI reporting.

### CORE SKILLS

**Business analysis:** Requirements gathering, BRD/FRD, user stories, acceptance criteria, API mapping, process mapping, gap analysis, root cause analysis, funnel analysis, UAT, stakeholder reporting

**Data & analytics:** SQL (PostgreSQL), advanced Excel, Power BI, Mixpanel, Amplitude, KPI analysis, data validation, P&L reconciliation

**Product & delivery:** Agile/Scrum, SDLC, backlog refinement, requirement prioritization, release validation, Jira, Confluence

**Technical:** REST APIs, webhooks, JSON, Postman, API validation, GitHub

**Domain:** Fintech, algorithmic trading systems, broker APIs, FIX Protocol basics, execution analytics, trade journaling

**AI-assisted work:** ChatGPT, Claude and GitHub Copilot for early drafts and information synthesis; verify outputs against source data and business rules.

### EXPERIENCE

#### BUSINESS ANALYST (PRODUCT & DATA) | AlgoRishi Pvt Ltd | Sep 2026 - Present

Hyderabad, India

- Mapped broker API endpoints and webhook flows for Alice Blue and Angel One, documenting activation steps, status changes and common failure cases.
- Queried PostgreSQL to reconcile source signals with broker execution logs; traced a P&L mismatch to a data-pipeline delay and supported correction of the verification flow.
- Analyzed the notification-to-order journey in Mixpanel and Amplitude; identified a mobile-flow exit point and helped shape One-Tap Execution.
- Led UAT for live push alerts, covering entry, target and stop-loss events in more than 50 Postman cases and validating dashboard updates against the 500 ms target.
- Replaced a manual spreadsheet routine with direct product-usage metrics for reporting to the CEO and engineering lead.
- Managed the Jira backlog, translated trading-engine needs into user stories and acceptance criteria, and coordinated weekly releases with a team of four software engineers.

### PROJECT

#### BROKER API ONBOARDING AND TRADING SIGNAL VERIFICATION | Confidential work project

Connected third-party brokers to the core signal engine and reconciled broker executions against intended trades.

- Gathered requirements and documented data and status changes between the app, broker authentication and signal engine, including failure states and activation checks.
- Built a verification trail matching signals to executions by identifiers, timestamps, instrument, quantity and price; traced a leaderboard mismatch to a feed delay.
- Analyzed the notification-to-execution funnel and informed the One-Tap Execution change.
- Ran more than 50 API and UAT cases across entry, target and stop-loss events; validated dashboard updates against the 500 ms target and tracked defects through weekly releases.

### EDUCATION

Acharya Nagarjuna University | Guntur, Andhra Pradesh | Jun 2023 - Feb 2027

Bachelor of Commerce (Computer Applications) | CGPA: 8.0/10

### TOOLS & LANGUAGES

**Tools:** SQL (PostgreSQL), Excel, Power BI, Postman, Mixpanel, Amplitude, Jira and Confluence

**Languages:** English (Advanced, C1), Telugu (Native), French (Upper-Intermediate, B2), Hindi (Basic, A2)
