PROFESSIONAL SUMMARY

Business analyst with hands-on experience at AlgoRishi, a Hyderabad fintech platform that generates and auto-executes algorithmic trading signals for retail traders. Comfortable gathering requirements from founders and engineers, digging into signal-performance data in SQL and Excel, and running UAT before releases. Uses ChatGPT and Copilot day to day to speed up documentation, query drafting, and data summaries, and is building further AI and data skills through Data Science with Python and Big Data Analytics with R coursework.

CORE SKILLS

AI Tools & Productivity: ChatGPT and Claude for drafting requirements and user stories, Microsoft Copilot (Excel, Power BI), AI-assisted SQL query writing, Python (pandas) for quick data checks, prompt-based data summarization

Business Analysis: Requirements Gathering, User Stories, Process Mapping, UAT, Gap Analysis, Stakeholder Documentation

Analysis & Reporting Tools: SQL, Excel (Pivot Tables, Power Query), Power BI, Jira, Confluence, Lucidchart

Data & Programming: Python, R, MySQL

Domain & Soft Skills: Fintech and Trading Products, Agile/Scrum, Cross-Functional Coordination, Clear Written Documentation

PROFESSIONAL EXPERIENCE

Business Analyst, AlgoRishi Pvt Ltd

Sep 2026 – Present

Hyderabad, India · Retail fintech / algorithmic trading-signals platform

Gathered and documented requirements from the founder, quant strategist, and engineering team for the trade journal and public Proof page, writing 15+ user stories per sprint in Jira/Confluence and cutting mid-sprint scope changes by 20%.

- Used ChatGPT to draft first-pass user stories and acceptance criteria from stakeholder notes, then refined them with the team, shaving roughly a day off each sprint's documentation work.
- Analyzed subscriber and trade-performance data in SQL and Excel across 5,000+ algorithm-generated signals, finding that traders who used the Leak Finder tool in their first week retained at a 35% higher rate — a finding that shaped the onboarding redesign.
- Defined acceptance criteria and led UAT for the Tradetron broker auto-execution integration, logging and triaging 40+ defects before launch and cutting post-release support tickets by 25%.
- Built and maintained a weekly performance dashboard in Excel and Power BI, using Copilot to speed up formula-writing and summary text, tracking win rate, average P&L, and subscriber churn for leadership and cutting manual reporting time from 6 hours to under 1 hour per week.
- Mapped the end-to-end signal workflow (signal fire, entry, stop-loss/trailing exit, public Proof page) in Lucidchart, which surfaced a 90-second publishing lag that engineering later reduced to under 15 seconds.
- Coordinated broker-listing requirements for Alice Blue across compliance, engineering, and the broker's API team, keeping a 3-month integration on schedule with no missed milestones.

EDUCATION

Bachelor of Commerce (Computer Applications)

June 2023 - Apr 2027

Acharya Nagarjuna University · GPA: 8.0/10 · Guntur, Andhra Pradesh, India

Relevant coursework: Data Science using Python, Big Data Analytics using R, Database Management Systems, Business Statistics, E-Commerce and Web Designing, Programming with C and C++.

LANGUAGES

English (Advanced, C1), Telugu (Native), French (Upper-Intermediate, B2), Hindi (Basic, A2)
