PROFESSIONAL SUMMARY

Business Analyst with 1 year of experience in a fintech trading-platform team, turning client and business needs into build-ready requirements and validating outcomes with data. Delivered **50+ user stories**, **150+ UAT scenarios** across **18 releases**, and Power BI reporting that cut manual reporting effort by **~30%**. Hands-on with SQL, Advanced Excel, Power BI, Jira, Confluence and Postman, with working knowledge of REST APIs and AI-assisted productivity tools.

CORE SKILLS

Business Analysis: Requirements Gathering, BRD/FRD, User Stories, Acceptance Criteria, Use Cases, Process Mapping, Gap Analysis, Root Cause Analysis, UAT, Stakeholder Management

Data & Analytics: SQL, Advanced Excel, Power BI, KPI Analysis, Data Validation, Data Cleaning, Trend Analysis

Product & Delivery: Agile/Scrum, SDLC, Backlog Refinement, Requirement Prioritization, Jira, Confluence

Technical: REST APIs, JSON, Postman, API Validation, Basic Database Concepts, GitHub

AI & Productivity: ChatGPT, Claude, Microsoft Copilot, AI-assisted Analysis and Documentation

Domain: Fintech, Trading Platforms, Market Data, P&L Analytics, Trade Journaling

EXPERIENCE

BUSINESS ANALYST — AlgoRishi

Sep 2026 – Present

Hyderabad, India

- Ran **20+** stakeholder and client sessions and converted requirements into **50+ user stories** with acceptance criteria and functional specifications for engineering.
- Cut developer and QA clarification queries by **~20%** by standardizing story templates, business rules and edge-case checklists in Confluence.
- Validated **3,000+ trade records** with SQL and Excel, identifying **15** P&L and data inconsistencies before release.
- Built **4 Power BI dashboards** for KPI and product reporting, reducing recurring manual reporting effort by **~30%** (about 5 to 3.5 hours per week).
- Designed and executed **150+ UAT scenarios** across **18 releases**; logged **40+** defects and requirement gaps in Jira, with **~90%** resolved before go-live.
- Validated **10+** REST API endpoints in Postman (JSON) to trace data-flow issues to their root cause during analysis and testing.
- Supported Agile sprints with backlog refinement, prioritization and requirement clarification, keeping scope and decisions traceable in Jira and Confluence.
- Used ChatGPT, Claude and Microsoft Copilot to speed up documentation and first-draft SQL, validating every output against business rules and source data.

PROJECT

Trading & P&L Analytics

github.com/SreekanthWork/trading-pnl-analytics

Business Analyst workflow project. The public GitHub version uses synthetic data.

- Defined requirements, user stories and acceptance criteria for trade records, P&L calculations, filters and reporting needs.
- Validated a **120-trade, 6-instrument** dataset by recalculating gross and net P&L in SQL and Excel and reconciling to source values (net P&L 296,442.98).
- Analysis showed one instrument (BANKNIFTY-FUT) drove **~99%** of net P&L, a concentration insight for the reporting requirements.
- Prepared and executed **7 UAT test cases** and mock REST API checks covering normal trades, incomplete data and calculation exceptions.

EDUCATION

Acharya Nagarjuna University — Guntur, Andhra Pradesh

Jun 2023 – Feb 2027

Bachelor of Commerce (Computer Applications) | CGPA: 8.0/10
